

Orientation Package

Pharmaceutical Market Access in Canada

We at CCPE want you to get the most from your investment of time, effort and money in this program. The market access environment in Canada has multiple stakeholders who each need to be understood thoroughly if a medication is to be launched and marketed successfully.

The complexities of market access need to be especially well understood by those working directly with the approval bodies and payers. In addition, marketers and members of the executive team need to have a clear understanding of the access process in order to effectively plan strategy. Even at the level of the representative, the better understood the entire access environment, the better the sales team is able to provide information, solutions to access barriers and value to their customers.

General Information

What’s in it for me?

- By assimilating, understanding and applying the knowledge and concepts you learn in these modules, you will be able to conduct articulate, credible conversations with healthcare professionals.
- You will be on the leading edge of information related to this important dynamic area.
- Each continuing education course you take contributes to widening your knowledge, expanding your medical horizons and increasing your employability.

What is a PIN for?

You may wonder why you have a CCPE PIN (personal identification number). You can use it for identification and to secure confidential information about yourself in our database. For example, to access your exam on our website, you must enter your 6 digit **PIN**. If you have forgotten your **PIN**, also called “student number” (which can be found on the bookmark sent with your course material), please call CCPE customer service at **514 333-8362 (toll-free 1 888 333-8362)** Monday to Friday from 8:30 a.m. to 4:30 p.m. (Eastern) or send an email at info@ccpe-cfpc.org and we will contact you the next business day.

Study Guide

This course was developed with your success in mind. The passing mark is 60%. The program consists of the following components:

- Paper-Based course material
- Preparation Exam
- Certification (final) Exam

(Preparation exam: You have access to an online preparation exam on our website. The goal of this exam is twofold. First, it gives you a clear idea of the types of questions asked in the final exam. Second, it allows you to prepare for an on-line exam in a real situation. The preparation exam is available in your portal on CCPE website at all times.)

To take full advantage of this course, we suggest a specific learning path:

1. Read the learning tips in this document, to optimize your learning effort
2. Proceed with a first reading of the paper material
3. Attempt to complete the preparation exam without any assistance
4. Proceed with a second reading of the paper material
5. Review the preparation exam and your notes
6. Proceed with your final evaluation on our website

At this point you probably want to assess how much time you will need to dedicate to your learning and plan your study time for the next few weeks or months. Study time will vary from one individual to another depending on educational background, previous learning experience using similar material and, learning styles.

With an average study rate of 10 pages per hour (including review questions and the preparation exam) you are likely to require 20 hours of study.

Learning Tips

Your learning and development plan may include reading books, consulting web pages or attending a seminar. We recommend that you consider the following suggestions to optimize your learning and apply the knowledge you acquired into practical skills:

- **Make this course book yours. Write in the text. Mark it up. Capturing your thoughts in writing helps you remember them and articulate your thinking.**
- Rather than reading an entire course, explore the table of contents to **assess which sections are most relevant to you. Read these sections first.**
- **Search for one insight** or application in everything you read. Draw conclusions and search for meanings relevant to your development.
- While reading, **highlight or bookmark sections** that you deem interesting or applicable to you. Consider creating a summary to help you convert knowledge into action the next day.
- Build time into your schedule to **reflect on your learning and apply to your job what you have learned.** Your behaviour will not change simply because you have learned something from a book or training program. You have to consider what you will do and make time to implement it.
- Anticipate barriers to completing and applying the coursework and prepare solutions ahead of time so you are ready when they pop-up.
- **Keep your reading source handy** for quick reference as a means to improve your competencies.
- Always determine what you will do with your new information or insight. **Set a new goal and act on it.**

- After course completion, you may benefit from **discussing your ideas** and your action plan with a peer, a coach, a mentor, or your supervisor.
- **Choose learning experiences that are relevant** to your objectives and provide you with the best chance to practice and apply new information and skills.
