If you have forgotten your **PIN**, also called “student number” (which can be found on the bookmark sent with your course material), please call CCPE customer service at **514 333-8362** (toll-free 1 **888 333-8362**) Monday to Friday from 8:30 a.m. to 4:30 p.m. (Eastern) or send an email at [info@ccpe-cfpc.org](mailto:info@ccpe-cfpc.org) and we will contact you the next business day.

## Study Guide

This course was developed with your success in mind. The passing mark is 60%.

The program consists of the following components:

- Paper-Based course material (PDF available on CCPE website)
- Preparatory exam
- Certification (final) Exam

**Preparatory exam:** The goal of this exam is threefold. First, it gives you a clear idea of the types of questions asked in the certification exam. Second, it allows you to prepare for the on-line certification exam in a real situation. And finally, it allows you to assess your current level of knowledge of the content, determine your knowledge gaps to direct your study of the content.

**To take full advantage of this course, we suggest a specific learning path:**

1. Read the learning tips in this document, to optimize your learning effort
2. Proceed with the pretest in the “myCCPE” portal on our website
3. Note your areas of strengths and weaknesses
4. Flip through the section headings
5. Read the course content highlighting and taking notes where you see fit
6. Review your notes and highlights
7. Proceed with your certification exam in “myCCPE” portal

At this point you probably want to assess how much time you will need to dedicate to your learning and plan your study time for the next few days, weeks or months. Study time will vary from one individual to another depending on your work background, previous learning experience using similar material and, learning styles.

We assume it will take 7 hours of study per 10 pages of course material.

## Learning Tips

Your learning and development plan may include consulting web pages, discussions with colleagues, and searching out other sources of information. We recommend that you consider the following suggestions to optimize your learning and apply the knowledge you acquired into practical skills:

- **Make this course book yours. Write in the text. Mark it up. Capturing your thoughts in writing helps you remember them and articulate your thinking.**
- Rather than reading an entire course, explore the table of contents to **assess which sections are most relevant to you. Read these sections first.**
- **Search for one insight** or application in everything you read. Draw conclusions and search for meanings relevant to your development.
- While reading, **highlight or bookmark sections** that you deem interesting or applicable to your situation. Consider creating a summary to help you convert knowledge into action the next day.
- Build time into your schedule to **reflect on your learning and apply to your job what you have learned.** Your behaviour will not change simply because you have learned something from a book or training program. You have to consider what you will do and make time to implement it.
- Anticipate barriers to completing and applying the coursework and prepare solutions ahead of time so you are ready when they pop-up.
- **Keep your reading source handy** for quick reference as a means to improve your competencies.
- Always determine what you will do with your new information or insight. **Set a new goal and act on it.**
- After course completion, you may benefit from **discussing your ideas** and your action plan with a peer, a coach, a mentor, or your supervisor.
- **Choose learning experiences that are relevant** to your objectives and provide you with the best chance to practice and apply new information and skills.
